Tech Mahindra

INTERVIEW QUESTIONS

Technical Question With Code (Technical)

TECHNICAL QUESTION WITH CODE

(With Sample answer , Tips and Code Snippet)

01 What methodologies do you use in business analysis?

💬 Sample Answer

: I am familiar with various methodologies such as Agile, Waterfall, and Six Sigma. I prefer Agile for projects requiring flexibility and iterative development, as it allows for continuous feedback and adjustments

☀ Interview Tip

Discuss specific projects where you applied these methodologies and the outcomes, emphasizing your adaptability to different environments

02 How do you gather requirements from stakeholders?

💬 Sample Answer

I use a combination of interviews, surveys, and workshops to gather requirements. I ensure I engage all relevant stakeholders to understand their needs and expectations fully

☀ Interview Tip

Mention a specific instance where your gathering techniques led to clear and actionable requirements

03

Can you describe your experience with data analysis tools?

💬 Sample Answer

I have experience with tools like Excel, SQL, and Tableau for data analysis. I use SQL for querying databases, Excel for data manipulation, and Tableau for visualizing data trends and insights

💡 Interview Tip

Highlight specific analyses you conducted using these tools and the impact of your findings on decision-making.

04

How do you prioritize requirements?

💬 Sample Answer

I prioritize requirements based on business value, stakeholder impact, and feasibility. I often use techniques like MoSCoW (Must have, Should have, Could have, and Won't have) to categorize and prioritize effectively

💡 Interview Tip

Provide an example of a project where your prioritization helped streamline development and meet critical deadlines

ELYSIUM INTERVIEW QUEST

ELYSIUM ACADEMY®

05 Explain how you validate requirements.

💬 Sample Answer

: I validate requirements through stakeholder reviews and use cases. I create prototypes or mockups to visualize requirements, which helps ensure alignment and gather feedback before development begins

💡 Interview Tip

Discuss a project where validation led to significant changes that improved the final product.

06 What role does a Business Analyst play in project management?

💬 Sample Answer

A Business Analyst serves as a bridge between stakeholders and the development team, ensuring that requirements are well-defined and understood. I help manage scope and facilitate communication throughout the project lifecycle.

💡 Interview Tip

Share experiences where your involvement as a BA directly contributed to a project's success

07 How do you handle conflicting stakeholder requirements?

💬 **Sample Answer**

I first facilitate a meeting with the stakeholders to understand their perspectives. I seek common ground and focus on the project's objectives to find a solution that meets the majority's needs while adhering to business goals

💡 **Interview Tip**

Provide a specific example of a conflict you resolved, highlighting your negotiation and communication skills

08 Describe your experience with creating business process models.

💬 **Sample Answer**

I've created business process models using BPMN (Business Process Model and Notation) to visualize workflows. This helps identify bottlenecks and areas for improvement, leading to more efficient processes

💡 **Interview Tip**

Mention a specific process improvement project and the metrics you used to measure success

09 What is your approach to stakeholder management?

💬 Sample Answer

: I prioritize clear and consistent communication. I keep stakeholders informed through regular updates and seek their input throughout the project. Building trust and rapport is key to successful stakeholder management

💡 Interview Tip

Discuss how you've built strong relationships with stakeholders and the impact on project outcomes

10 Can you explain the importance of user stories in Agile?

💬 Sample Answer

User stories capture the end user's perspective and are essential for defining requirements in Agile. They help the team understand user needs and prioritize work effectively, ensuring that the most valuable features are delivered first.

💡 Interview Tip

Share examples of user stories you've created and how they influenced project development

11 How do you approach change management?

💬 **Sample Answer**

I approach change management by assessing the impact of changes on the project scope and stakeholders. I develop a communication plan to inform all parties and provide training if necessary to ensure smooth transitions

💡 **Interview Tip**

Highlight a specific change initiative you managed and the strategies you employed to facilitate it

12 Describe a time you used data to drive business decisions

💬 **Sample Answer**

In a previous role, I analyzed customer feedback data to identify trends in product dissatisfaction. This analysis led to actionable insights that prompted changes in product features, resulting in a 25% increase in customer

💡 **Interview Tip**

Provide quantitative results from your analysis to emphasize the impact of your work.

13 What is your experience with requirements documentation?

💬 Sample Answer

I create comprehensive requirements documentation that includes functional and non-functional requirements, use cases, and acceptance criteria. I ensure that the documentation is clear, concise, and accessible to all stakeholders

💡 Interview Tip

Mention any specific formats or tools you prefer for documentation and their benefits

14 How do you ensure your analysis aligns with business goals?

💬 Sample Answer

I start by thoroughly understanding the organization's strategic objectives. Throughout the analysis process, I regularly check in with stakeholders to ensure that our goals align and make adjustments as needed.

💡 Interview Tip

Share a specific example of how you aligned a project with business goals and the results achieved.

15 Can you explain what a SWOT analysis is?

💬 Sample Answer

A SWOT analysis evaluates the Strengths, Weaknesses, Opportunities, and Threats of a business or project. I use it to identify internal and external factors that could impact success and inform strategic decision-making

💡 Interview Tip

Provide an example where you conducted a SWOT analysis and how it influenced a business strategy

16 What techniques do you use for requirement elicitation?

💬 Sample Answer

I utilize interviews, workshops, surveys, and document analysis for requirement elicitation. Each technique is chosen based on the project context and stakeholder availability to ensure comprehensive requirement gathering

💡 Interview Tip

Discuss a particularly challenging elicitation process and how you overcame obstacles.

17 — How do you approach system integration projects?

💬 Sample Answer

For system integration projects, I focus on understanding both systems' functionalities and how they interact. I document integration requirements clearly and work closely with technical teams to ensure seamless integration

💡 Interview Tip

Provide a specific example of a system integration project you managed, detailing the challenges and solutions

18 — Describe a successful project you led and your role in it.

💬 Sample Answer

I led a project to implement a new CRM system. My role involved gathering requirements, coordinating with vendors, and managing stakeholder communications. The project was completed on time and improved sales team

💡 Interview Tip

Emphasize your leadership skills and how your contributions made a tangible difference.

19

How do you handle tight deadlines?

💬 Sample Answer

I prioritize tasks based on urgency and importance, communicate with the team to set realistic expectations, and remain flexible to adjust plans as necessary. I focus on delivering high-quality work within the constraints

💡 Interview Tip

Share a specific experience where you met a tight deadline and the strategies you employed

20

What is your experience with customer journey mapping?

💬 Sample Answer

I have created customer journey maps to visualize the user experience across various touchpoints. This helps identify pain points and opportunities for enhancement, allowing us to optimize the overall customer experience.

💡 Interview Tip

Provide an example of a journey mapping project and how it led to actionable insights.

21 Can you explain the role of KPIs in business analysis?

💬 Sample Answer

KPIs (Key Performance Indicators) are essential for measuring the success of business initiatives. I establish relevant KPIs at the project outset to track progress and make informed adjustments throughout the project lifecycle

💡 Interview Tip

Mention specific KPIs you've developed or used in past projects and their significance.

22 How do you ensure effective communication within a project team?

💬 Sample Answer

: I establish regular check-ins, use collaboration tools like Slack or Microsoft Teams, and create clear documentation. Transparency is key to ensuring everyone is aligned and informed throughout the project

💡 Interview Tip

Discuss specific tools or practices you implemented that improved team communication and collaboration

23 What strategies do you use for risk management?

💬 **Sample Answer**

I identify potential risks early in the project and assess their impact. I develop mitigation strategies and regularly review risks throughout the project to ensure we are prepared to address any issues that arise

💡 **Interview Tip**

Share a specific example where proactive risk management led to a positive outcome.

24 How do you approach vendor selection?

💬 **Sample Answer**

I assess vendors based on their capabilities, experience, and alignment with our project needs. I conduct a thorough evaluation process that includes vendor presentations, reference checks, and comparison of proposals

💡 **Interview Tip**

Highlight any specific vendor selection processes you've managed and the criteria used for evaluation

25 Can you explain the importance of change requests in project management?

💬 Sample Answer

Change requests are vital for managing project scope and ensuring that any adjustments align with business goals. I track change requests carefully, assess their impact, and communicate them to stakeholders for approval

💡 Interview Tip

Discuss how you've handled change requests in past projects and their implications on project success.

Thank You!
